

# Sandbox API Keys

Manage the ways you authorize requests to Braintree: API keys for server requests, Tokenization keys for client requests, and Client-Side Encryption Keys for client-side encryption.

## API Keys

Server use only, should not be shared.

Public Key	Private Key	Last Used On	Actions
2qqn8zpcnhddn2jq	View	Never Used	<button>Delete</button>

## Tokenization Keys

For use in Braintree SDKs

Key	Label	Last Used On	Status	Actions

## Client-Side Encryption Keys

For use in client SDKs prior to Braintree SDKs
